The Reagan Presidency has grievously reshaped the priorities of this nation.

The pressing needs of citizens are no longer being met. Social programs are being abandoned with little concern or attention to the effects on people -- the needy, the unemployed and the elderly. Economic growth is being inhibited by a crumbling physical infrastructure throughout the country, and by a lack of government services to support the productivity and competitiveness of the private sector. Abrogation of responsibility at the federal level has dumped an impossible burden onto state and local governments; they are expected to cope with the consequences of federal neglect with dwindling resources.

Federal spending cuts during the Reagan Administration's four years in office would reach a cumulative total of $88 billion if its FY 1985 budget were enacted as proposed. Reductions in federally supported state and local services -- education, health services, employment and job training, income maintenance and human services, and infrastructure and economic development programs -- account for losses of $59 billion, while direct federal assistance to needy and elderly people would drop by $29 billion. The grim details of these astounding cuts are documented in this report, for every state and every program.

These insensitive and insensible cuts have caused massive reductions in services. Already, as a result of this Administration's actions, 493,000 families have been dropped from the AFDC program, 660,000 children have lost their Medicaid health coverage, one million participants have been terminated from the Food Stamps program, and 150,000 poor families have lost day care services.

If the cuts proposed in the Administration's FY 1985 budget are enacted, or if still additional cuts are made in a misdirected effort to reduce the deficit, we can expect a further expansion of this litany of inequity and suffering. The additional reductions proposed in the Administration's Budget would result in social spending that is $29 billion below FY 1981 service levels.

Where have these funds gone? They have gone to promote the interests of the wealthy and big business, in order to fund the failed experiment of trickle down economic growth. They have gone toward an unprecedented peacetime military build-up that has failed to promote peace or safety in the world.

The results of this unconscionable shift in basic national priorities have been an increase in economic insecurity for the average American, rising poverty, a less equitable tax system, a bloated military, and a run-away federal deficit.

These problems must be redressed. Lost tax revenues must be restored in a fair manner, based on ability-to-pay. Military spending must be restrained to affordable levels. Social programs must meet pressing needs.

It is time that the excesses of the Reagan Administration be curbed, and that balance and equity, once again, guide our nation's priorities.

In Solidarity,

Gerald W. McEntee

The calculation of state-by-state, program-by-program cuts in federal assistance was prepared for AFSCME by Fiscal Planning Services, Incorporated.

This report presents a four year, program-by-program and state-by-state analysis of the social spending cuts enacted since FY 1981, including President Reagan's proposed cuts for FY 1985. The programs analyzed encompass both direct federal payments to individuals, and federal support for services delivered by state and local governments. The impact is determined both for the country as a whole, and for each of the fifty states, the District of Columbia and Puerto Rico. The major findings are:

- The FY 1985 budget proposed by the Reagan Administration would bring domestic spending cuts to $88 billion since FY 1981 -- $59 billion eliminated in grants-in-aid to state and local governments, and $29 billion cut from entitlement programs for individuals.

- Reductions in social spending in President Reagan's proposed FY 1985 budget would amount to nearly $29 billion, the largest single year loss by far during this Administration. Losses in the previous years were $22 billion in FY 1984, $18 billion in FY 1983 and $20 billion in FY 1982.

- Many federally supported state and local programs would face cuts of over 50% during the Reagan years, including the Special Milk program, Juvenile Justice Assistance, Appalachian Regional programs, Economic Development Administration programs, Job Training programs, the Work Incentives program, the Community Services program, and Energy Conservation programs.

- The most severe reduction in direct assistance to individuals was inflicted in the means tested Food Stamps program, which was reduced by nearly 6%. The elderly, in particular, have borne a heavy burden with a steep reduction in the Medicare program, which sustained the largest total dollar cut in aid to individuals.

- The ten states suffering the highest per capita cuts in grants-in-aid to state and local governments are the District of Columbia, Alaska, Puerto Rico, New York, West Virginia, Vermont, Rhode Island, Michigan, Massachusetts and South Dakota.

- The ten states in which per capita losses in payments to individuals have been the highest are Florida, Pennsylvania, the District of Columbia, Rhode Island, New York, Massachusetts, Michigan, West Virginia, Missouri and Maine.

An even better way to illustrate the insensitivity and insensibility of the Reagan budget cuts is to examine some of the reductions in specific services that these cuts have caused:(1)

- AFDC -- One outcome of the Reagan initiatives in 1981 was to severely restrict benefits to families with earnings. As a result, in 41 states, a mother with three children with earnings of $5,750 -- less than 60% of the poverty line -- loses all AFDC benefits after four months. In over half the states, the cut-off is below $5,000 -- below 50% of the poverty line. In six states, a mother earning only $2,700 a year -- below 27% of the poverty line -- is dropped from the AFDC program.

  As a result of these and other cuts, the General Accounting Office (GAO) reports that 493,000 families have been pushed from the AFDC program. The GAO report examined in depth the effects of these cuts on former AFDC recipients in five cities -- Boston, Milwaukee, Syracuse, Dallas and Memphis. These in depth examinations revealed that the people removed from the AFDC rolls suffered large losses of income and many are now living in poverty. A study on how AFDC policy changes affected low-income families by the Center for the Study of Social Policy reaches similar conclusions to the GAO study in finding that: "Federal budget cuts enacted in 1981 doubled the number of families in poverty among a sample of working-poor female-headed families in Michigan and New York City."

- Medicaid and Other Health Care -- In the majority of states that have AFDC cut-offs below $5,000, mothers and their children also lose Medicaid benefits. According to the Children's Defense Fund, some 660,000 children have lost their health coverage because of AFDC reductions. The GAO study of the 1981 AFDC changes reports that only between 13 and 31 percent of those pushed off the AFDC rolls were being covered by Medicaid and only a small percentage indicated that they had any other kind of government health coverage.

  One consequence of the cuts in Medicaid, as well as other health programs, has been a reduction in prenatal care, which has resulted in a rise in infant mortality. The Children's Defense Fund study of 35 states found that in 1982 two-thirds of the states showed an increased percentage of women receiving late or no prenatal care. Not surprisingly, twenty states in 1982 reported increased death rates for some or all infant populations.

- Food Stamps -- One million participants have been terminated from the Food Stamp program. All who remain have had their benefits reduced. Over 80% of the benefit cuts have come from families with incomes below the poverty line. The average gross income of a food stamp household is $4,180 annually. Half of all food stamp households have incomes of less than $300 a month. On average, food stamp benefits amount to just 48 cents per person per meal.

- Child Nutrition -- The sharp cuts in child nutrition programs has meant that: the number of children receiving school lunches each day fell by 3 million, including 1 million low-income children; half a million fewer children now participate in the school breakfast program; and half-million fewer low-income children receive summer lunches.

  These cuts in child nutrition have come at a time of mounting clinical evidence of serious health problems among poor children who lack enough to eat. The Massachusetts Department of Public Health issued a major study last fall which found that between 10,000-17,500 poor children in Massachusetts are stunted, due largely to chronic malnutrition. In Chicago, Cook County Hospital experienced a 24 percent increase from the summer of 1981 through the summer of 1983 in the number of children admitted for failure to thrive, diarrhea, or dehydration -- conditions often linked to inadequate nutrition.

- Job Training -- Some of the steepest cuts have been in the job training area. Public Service Employment jobs have been completely abolished. Of the 300,000 who lost their jobs, half were minorities, half were women, and virtually all were low income. Six months after the Public Service component of CETA was dismantled, the Department of Labor reported that 44 percent of the former participants were still without any kind of jobs or job training. At the same time, the Government Accounting Office reported that only 25 percent of former participants had found full-time jobs, and another 5 percent were receiving training.

- Social Services (Title XX) -- The Children's Defense Fund estimates that 150,000 poor families have lost their day care as a result of the reduction enacted under the Reagan Administration.

- Education -- The number of poor and minority students receiving compensatory education assistance to overcome their problems in reading and mathematics has declined sharply. In a survey conducted by the Children's Defense Fund during the summer of 1983, 32 states reported serving fewer children in the 1982-1983 school year than in the previous year. Thirteen states reported eliminating certain kinds of programs entirely, including math, secondary and preschool programs. Since the Reagan Administration took office, approximately 500,000 fewer students participated in the compensatory education program. These cuts in education have occurred when an estimated 13 percent of American 17-year-olds are functionally illiterate.

The purpose of these spending cuts has not been to encourage more efficient or effective delivery of public services, or to reduce the overall size of government. Instead, these huge cuts represent a departure from the basic role of government in our society. The cuts have abrogated the nation's commitment to providing for the needy and to insuring a quality infrastructure of education, job training, mass transit, water treatment plants and other public facilities.

In just four years the Reagan Administration has radically shifted the priorities of this nation. Little priority is given to pressing domestic needs. Resources have been shifted to an unprecedented military buildup and to gutting the nation's tax system with inequitable "supply-side tax" cuts.

The consequences of these policies are painfully evident. We are a nation plagued by growing economic insecurity, soaring poverty and increased inequality. The tax cuts have not stimulated investment or economic growth, but simply lavish benefits on corporations and wealthy individuals. Our bloated military, meanwhile, has not been an effective force in promoting peace or safety in the world.

These policies of the Reagan Administration have also been fiscally irresponsible. The huge boost in defense spending together with the enormous tax giveaways have resulted in large, runaway federal budget deficits. These deficits are costly to the Federal Treasury and are a possible threat to the continued recovery from the most severe economic downturn since the Great Depression.

The need to reduce these deficits is a major challenge facing our nation. The equitable and responsible solution to closing the federal budget deficit is to reverse the Reagan Administration policies that created these deficits by

- moving towards an equitable tax system where individuals and corporations contribute on the basis of their ability to pay, and

- limiting increases in military spending to a sensible level that carefully weighs the security needs of the nation against the social and economic needs of our society.

In developing an equitable and responsible solution to the federal budget deficit crisis, social programs must not only be spared further cuts; they should receive additional funding to ameliorate the needs they are presently failing to meet.

Analysis of Cuts

This report examines how the Reagan budget cuts affected each of the fifty states, the District of Columbia and Puerto Rico on a program-by-program basis. The report measures cuts in 172 individual federal aid programs to state and local governments, as well as in five of the major federal assistance programs to needy and elderly individuals. Altogether the programs considered in this report account for nearly 90 percent of all federal aid to state and local governments and 75 percent of all federal payments to needy and elderly persons.

The losses calculated in this report reflect the real changes in program levels or policies since the Reagan Administration took office, given changing economic circumstances. Real reductions are defined as the difference between current funding levels and funding levels that would have existed had FY 1981 -- or pre-Reagan -- budget policies remained unchanged. Budget cuts on a per capita basis are also provided to facilitate comparisons of the relative severity of various program cuts among the states.

Overall, the cumulative reduction in social spending during the Reagan years would exceed $88 billion if the Reagan Administration's FY 1985 budget proposals are enacted. State and local governments face losses in federal assistance of $59 billion, while direct losses to needy and elderly individuals may mount to $29 billion at the hands of the Reagan Administration.

The Reagan Administration's proposed FY 1985 budget, if enacted, would inflict losses of $29 billion, the deepest cut in domestic spending in any of the Reagan years. Previously, FY 1984 recorded the largest cut at $22 billion, led by a

significant rise in direct aid losses to individuals. For FY 1982 and FY 1983, the domestic spending reductions reached $20 billion and $18 billion, respectively.

Table 2 presents the percent reductions for each program. It is apparent that the reductions sought and enacted by the Reagan Administration in aid to state and local governments have fallen across all areas of domestic spending -- education, health services, employment and job training, income maintenance and human services, and infrastructure and economic development programs. The losses in direct federal payments to needy and elderly individuals have only deepened the hardship on those individuals already hurt by these steep reductions in federally funded services (see Table 3 for a description of each program).

A few programs have had their spending boosted above the FY 1981 spending level during the Reagan Years. These include Head Start, Food for Women, Infants and Children (WIC), Low Income Energy Assistance, and federal aid to Airports and to Highways. The increases in Head Start, WIC and Low Income Energy Assistance were achieved by an adamant Congress, reacting to the prolonged and severe recession. The rise in spending for federal aid to Highways is attributable to the 5 cent hike in federal gas taxes and, by itself, accounts for over four-fifths of the total increase in programs above 1981 policy levels.

The severity of the cuts across the states is reflected in the rankings of per capita cuts for each program. The ranking of per capita cuts indicates the level of need of a particular state for a certain program, since federal assistance is targeted on the basis of need. Thus, the greater the need for a program, the higher the per capita loss in that program. Table 4 lists for each program the rankings of per capita losses for the ten states suffering the largest reductions. The District of Columbia has suffered the highest per capita loss in social spending, due to the extremely large cuts in grants-in-aid programs needed by that exclusively urban jurisdiction. Florida, meanwhile, led the nation in per capita losses in federal assistance to individuals based on its disproportionately large elderly population and the costly cuts in the Medicare and Social Security programs.

The next two sections examine the effects of these reductions on state and local governments and on people. The final two sections discuss the current deficit reduction debate in light of these social spending cuts and the Reagan Administration's tax and military policies.

Effects on State and Local Governments

The Reagan years have brought on the worst fiscal conditions for state and local governments since the 1930's. State and local governments were devastated by revenue shortfalls resulting from the severe recession that lasted over one and a half years.

While the Reagan Administration's poor management of the economy crippled state and local governments, its attack on social spending simultaneously deprived state and local governments of a crucial lifeline for maintaining needed services.

The fiscal crisis at the state and local level reached its zenith in FY 1983 when eight states ran deficits and fifteen other states had razor-thin end-of-year balances of less than one percent of annual spending. The legacy of these difficult fiscal times remains. According to the National Conference of State Legislatures (NCSL), Fiscal Year 1984 shows only a slight improvement in state fiscal conditions -- with three states projected to run deficits, and seventeen other states expected to linger on the edge of deficits with balances of less than 1 percent of annual spending.(2)

In this era of fiscal crisis, state and local governments have been forced to limit spending severely, which has led to the decline in many crucial services. A survey by the National League of Cities found that spending rose less than the rate of inflation in 54% of all cities in Fiscal Year 1983 and is expected to rise below the inflation rate in 62% of all cities in Fiscal Year 1984.(3) At the state level, spending was cut across-the-board in 27 states and selective cuts were made in 37 states during Fiscal Year 1983. In the first half of FY 1984, 11 states have made further spending cuts.(4)

The assault by the Reagan Administration on social programs that is detailed in this report has significantly added to the decline in state and local government services, while placing even greater demands on their bare-boned budgets. This erosion of state and local services would have been alleviated under previous Administrations by increased federal spending, not accelerated by federal spending cuts. The need for the federal government to increase its support of state and local services during recessions is not just altruism to help state and local governments weather the recession, but rather is critical for alleviating the burdens of difficult economic times and for stimulating the economy. This tried and proven strategy was cruelly ignored by the Reagan Administration.

Effects on People

The social spending cuts pursued by the Reagan Administration have hurt millions of Americans, particularly low-income families. The Congressional Budget Office calculated that the Reagan budget cuts in human resource programs enacted between January, 1981 and July, 1983 will end up costing families with incomes less than $10,000 an average of $1340 from 1982 through 1985 and families with incomes between $10,000-$20,000 an average of $870 over that 4 year period. By comparison, families with incomes over $80,000 have suffered cuts of just $490, according to the Congressional Budget Office.(5)

These severe cuts have shattered the nation's social "safety net." One example of the inadequacy of the social "safety net" is that in February, 1984, only 36.9% of the reported 8.8 million unemployed Americans received unemployment benefits. In over half the states, moreover, two-parent families that run out of unemployment benefits are not eligible for cash welfare or Medicaid coverage, and can only qualify for food stamps if their family's assets sink low enough.

The cumulative effects of Reagan's assault on social programs has taken its toll. The Center on Budget and Policy Priorities points out that the same family that has had their welfare benefits cut, has also had their food stamp benefits cut, has been shelling out more for medical costs no longer picked up by Medicaid, has been paying more in rent if the family is fortunate to live in subsidized housing, and has been paying more for child care if the household head is lucky enough to hold a job.

Not surprisingly, recent studies have documented a sharp increase in poverty and a jump in income inequality in the nation. A February, 1984 Census study reports that poverty increased by 28 percent between 1979 and 1983, as 8.3 million Americans fell into poverty.(6) Meanwhile, a detailed study by the Urban Institute on expected changes in inflation-adjusted disposable income from 1979 through 1984 found that overall average disposable income fell by 2 percent. The poorest one-fifth of families suffered disproportionately as their incomes fell a steep 9.4 percent while the richest one-fifth of families escaped with just a 0.5 percent decline in their standard of living.(7)

The Reagan Administration's policies have taken a heavy toll on our economy, producing the most severe recession since the 1930's. Through its assault on social programs, the Reagan Administration has distributed the burdens of these difficult times squarely on the shoulders of middle and lower income American families. Instead of asking all Americans to sacrifice equally, the Reagan Administration has forced the less well-off to sacrifice for the well-to-do.

Misdiagnosing the Federal Deficit Problem

Even while slashing social programs, the Reagan Administration has created growing budget deficits of unprecedented proportions for as far into the future as the eye can see. Incredibly, the Reagan deficits have exceeded those of Presidents Truman, Eisenhower, Kennedy, Johnson, Nixon, Ford and Carter combined. The most recent estimate of the size of future federal deficits, prepared by the Congressional Budget Office, is numbing -- the deficits are expected to grow from $192 billion in FY 1985 to $248 billion in FY 1989.(8)

Federal deficits are not good or bad in and of themselves. During recession, deficit spending is helpful, assisting the recovery. The unusually large and growing size of the current federal deficits, coming during a period of recovery, is of grave concern since it has the potential for forcing the federal government to compete with private borrowers, which could drive up interest rates and possibly abort the recovery. These enormous deficits are also very costly to the Federal Treasury, requiring higher federal spending for interest costs on the federal debt. Finally, deficit-induced high interest rates drive up the value of the dollar and damage the competitiveness of America's industries.

What has caused these deficits? The Chairman of the President's Council of Economic Advisors, Martin Feldstein, put it best: "The things that raise the deficit are defense spending, interest on the national debt and the tax reductions."(9) The Congressional Budget Office has spelled out how the Reagan Administration's specific policies have created the prospect of rapidly growing federal deficits. As shown in Table 5, if Reagan's tax and spending policies had not been enacted, the federal deficit would shrink over time instead of grow. By FY 1989 the federal budget would post a surplus of $11 billion instead of a deficit of $248 billion.

The Reagan Administration's tax and military policies have been the driving force of the rapidly escalating federal deficits. The Congressional Budget Office calculates that the Reagan Administration's unprecedented boost in military spending and its steep tax reductions will account for 82 percent of the federal deficit in FY 1985.

The deficits caused by the Reagan Administration's tax and military policies will also require higher interest payments on the rapidly growing federal debt. The Congressional Budget Office estimates that interest costs will be $17 billion higher in FY 1985 and a staggering $88 billion higher by FY 1989 due to Reagan's policies. It is interesting to note that the rapidly rising interest costs will almost equal the total amount of non-defense cuts by FY 1989.

The tax and military policies that the Reagan Administration has sought are clearly excessive. The military build-up supported by the Reagan Administration will push Pentagon spending, even after adjusting for inflation, to its highest level since World War II, surpassing the peak amounts spent on the Korean and Vietnam Wars. As requested by the Reagan Administration, the cost of military spending would reach $3,800 for every household in the nation.(10)

Meanwhile, the tax reductions enacted by the Reagan Administration have made a shambles of the federal tax system. The corporate income tax has been drastically reduced by the

Reagan Administration, falling from 10.1 percent of total federal revenues in FY 1981 to 6.2% of total federal revenues in FY 1983. By enacting the Accelerated Cost Recovery System (ACRS) for business depreciation and by deepening the investment tax credit, the Reagan Administration has succeeded in virtually eliminating taxation for new business investments. ACRS represents a new corporate tax loophole that is not only very costly to the Federal Treasury, but has created enormous inequities between corporations and has reduced the quality of business investments by encouraging investments based on tax considerations instead of economic merit.

While undermining the corporate income tax, the Reagan Administration has also succeeded in shifting the personal income tax burden away from the rich and onto middle and lower income Americans. The much heralded personal income tax cuts of the Reagan Administration represented a huge tax bonus to the rich and just minimal tax relief to the majority of taxpayers, who have seen their small income tax cut eaten away by higher social security taxes and inflation. After all was said and done, those earning less than $30,000 had their total federal taxes increased.(11)

The bottom-line is that average Americans are paying more in taxes than ever before, even as tax collections are falling far short of meeting the cost of federal spending. The only winners from the Reagan Administration tax policies, and big ones at that, are corporations and the well-to-do.

The Reagan Administration is unwilling to curb the excesses of its tax and military policies and to restore the fiscal stability of the federal government. Rather, predictably, the Reagan Administration has continued its assault on social programs -- using the deficit as a justification for further cuts. The fact is that social programs are not the cause of the federal deficits, and only a re-consideration of the Reagan Administration's tax and military policies can truly reduce the federal deficit.

Restoring Equity and Sensibility to Federal Budget Priorities

After four years of the Reagan Administration, the time has come to restore equity and sensibility to the priorities of our federal government. We all favor a strong defense and less taxes, but not at the expense of less economic security for middle and lower income families, an inequitable distribution of taxes or a run-away federal deficit.

We propose a straight forward course of action that curbs the excesses of the Reagan Administration's tax and military policies, establishes a better balance in the priorities of the federal government, and reduces the enormous federal budget deficits:

- Military spending increases, after inflation, must be held down to reasonable levels of 3 percent growth or below, which would require real priorities in military spending to be set and would provide real incentives to eliminate waste and inefficiency.

- Spending for social programs should increase at the same rate as defense spending, which will insure that in meeting our military spending needs we do not compromise our social and economic needs.

- Fairness and simplicity must guide our tax policies in restoring lost revenues. We must close unproductive tax loopholes, insure effective corporate taxation of at least 25% and undo the regressive shift in individual taxes. Most importantly, we must reject regressive tax proposals, such as consumption taxes and flat rate income taxes, which further shift the burden of taxes away from the wealthy and on to middle and lower income Americans.

Over the next several years, the Reagan deficits could be cut nearly in half, through recouping one-half of the Reagan tax reduction and redistributing the tax burden, holding military spending to an inflation-adjusted 3 percent growth, and providing a matching rate of growth for domestic spending.

During the last four years, we have allowed the simple and shortsighted solutions sought by the Reagan Administration to be enacted. The results have been disastrous. Working Americans and, especially, the poor have paid dearly. A voice of reason is desperately needed now to put the nation on a more equitable and sensible course. The budget plan we are proposing to curb the excesses of the Reagan Administration is no panacea for long-term ills that beset our nation such as foreign competition, structural unemployment, and poverty, but it is a good beginning.

PROGRAM - BY - PROGRAM DESCRIPTION

PROGRAM	DESCRIPTION OF SERVICE	SERVICE PROVIDERS	BENEFICIARIES
GRANTS-IN-AID TO STATE AND LOCAL GOVERNMENTS			
• EDUCATION			
Bilingual Education	Provides programs in elementary and secondary school for students with limited English proficiency.	Mainly, public elementary and secondary schools.	School children of limited English proficiency.
Educationally Deprived Children	Provides financial assistance to meet educational needs of economically disadvantaged students.	Public and private elementary and secondary schools as well as special state institutions.	School children from economically disadvataged households, migrants, handicapped, neglected and delinquent children.
Education Block Grant	Financial Assistance to state and local education agencies to improve elementary and secondary education.	Public and private elementary and secondary schools, as well as state education agencies	Elementary and secondary students.
Handicapped Education	Direct educational programs, research projects and training programs for improving the education of handicapped children.	Public and private elementary and secondary schools as well as state education agencies.	Handicapped students attending elementary and secondary schools.
Impact Aid	Financial assistance to compensate school districts for revenue losses associated with Federal activities in the district.	Local school districts.	Public elementary and secondary school children.
Vocational and Adult Education	Provides financial assistance to states to plan and to conduct vocational education courses and basic education courses for adults.	Public schools and private vocational training schools; state agencies.	Individuals requires basic education on vocational training.

TABLE 3 Continued

Head Start	Provides health and educational services to preschool children from economically disadvantaged households.	Local governments or private non-profit organizations.	Economically disadvataged preschool children.
• EMPLOYMENT AND TRAINING			
Employment for older Americans	Provides part-time employment opportunities for low income older Americans.	State governments, public and private non-profit organizations.	Low income persons 55 years old or older.
Employment Services and U.I. Administration.	Financial Assistance to State agencies serving the unemployed.	State unemployment and employment service agencies.	Unemployed persons and employers seeking workers.
Job Training	Provides job training to economically disadvantaged persons and those dislocated by changes in the local economy.	State agencies	Recipients of AFDC and other public assistance programs.
• HEALTH SERVICES			
Preventive Health	Provides for comprehensive preventive health services including emergency medical services, health incentive activities, hypertension programs, rodent control, fluoridation programs, health education and risk reduction programs, home health services and services for rape victims.	State and local governments, private non-profit organizations.	General public

TABLE 3 Continued

Health Resources	Provides for health planning and to assist those pursuing careers in the health professions.	State and local health planning agencies, universities and hospitals.	Primarily those persons pursuing a degree in a health profession.
Health Services	Provides for maternal and child health services as well as assistance to community health centers.	State and local government, hospitals and private non-profit organizations.	Primarily low and moderate income persons.
Alcohol, Drug Abuse and Mental Health	Programs armed at preventing and treating alcohol and drug abuse and supporting community mental health centers.	State and local welfare agencies reimburse medical service providers.	Low income and medically needy persons.
Medicaid	Pays for the medical costs of low income and medically needy persons.	State and local welfare agencies reimburse medical service providers.	Low income and medically needy persons.
• NUTRITION			
Child Nutrition	Provides free or reduced priced breakfast and lunch to children from low income households.	School districts, non-profit organizations.	Children from low income households.
Elderly Feeding	Provides for nutrition programs for the elderly.	State agencies and charitable institutions.	Older Americans.
Special Milk	Provides for free and reduced price milk to children of high school grade and younger.	Elementary and secondary schools, child care centers, nursery schools, summer camps, and non-profit institutions.	Children of high school grade and younger.

TABLE 3 Continued

Food for Women Infants and Children	Supplies supplemental nutrition, food and nutrition education to low income mothers and children	Public and private non-profit organizations.	Pregnant or breast-feeding women and children up to 5 years, requiring special supplemental foods.
• INCOME MAINTENANCE AND HUMAN SERVICES			
AFDC and Child Support Enforcement	Provides for financial assistance to low income families with children and enforces the support obligations owed by absent parents to low income children.	State and local welfare agencies	Low income families with children.
Low Income Energy Assistance	Provides for payments to low income households to meet the costs of home energy.	State and local governments.	Low income persons.
Social Services	Provides for day care services, home maker and housekeeping services, counselling services, family planning and the preparation and delivery of meals to the house bound.	State and local governments.	Primarily low income persons and families.
Special Program for the Aging	Provides for special community and nutrition programs for the elderly.	State and local governments, private non-profit organizations.	Older Americans, especially those of greatest economic need.
Developmental Disabilities	Provides for support, advocacy, training and research projects for the developmentally disabled.	State and local governments, non-profit institutions and universities.	Persons with a developmental disability attributable to a mental and/or physical impairment.

TABLE 3 Continued

Community Services	Provide a range of services to alleviate poverty and assist low income participants.	Non-profit community antipoverty agencies; state and local agencies	Low income individuals.
Child Welfare Services	Provides financial assistance in adoption and foster care services and for other programs to protect children.	State and local agencies.	Children

TABLE 3 Continued

Subsidized Housing	Provides for housing assistance payments to private owners and public housing agencies on behalf of low income tenants.	Private owners and public housing agencies.	Low income families.
Juvenile Justice Assistance	Provides financial assistance for programs aimed at reducing the incidence of juvenile crime.	State and local governments, universities.	Agencies involved in juvenile delinquency prevention
Rehabilitative Services	Provides for basic services and training to persons with mental and/or physical handicaps.	State government agencies.	Persons with mental and/or physical handicaps.
• INFRASTRUCTURE AND ECONOMIC DEVELOPMENT			
Airports	Provides financial assistance to airports for planning, construction and renovation of its facilities.	State and county airports.	State and county airports.
Appalachian Regional Programs	Provides for health and education services as well as economic development activities in designated counties.	State and local governments, local school districts, non-profit organizations.	Persons and businesses locate in Appalachian counties.
Community Development Block Grant	Provides financial assistance for local housing economic development and neighborhood revitilization projects.	Local governments, and private contractors.	Persons residing in low and moderate income neighborhoods.
Economic Development Administration	Provides for public investment in economic development projects.	State and local governments and private contractors.	Persons and businesses located in economically distressed areas
Energy Conservation	Financial assistance in weatherization, energy conservation of public facilities and developing alternative energy technology.	State and local agencies, private contractors.	Low income individuals.

TABLE 3 Continued

	EPA Wastewater	Provides financial assistance for the planning and construction of wastewater treatment plants.	Local governments and private contractors.	General public.
	Federal Aid to Highway	Provides financial assistance for the planning and construction of interstate highways and bridges, as well as for some primary and secondary needs.	State government and private contractors.	General public.
	Urban Development Action Grants	Provides for public investment in urban economic development projects	Local governments and private contractors.	Primarily, persons and businesses located in economically distressed areas.
	Urban Mass Transit	Provides financial assistance for the planning, purchase and construction of mass transit systems.	Local governments and private contractors.	Primarily residents of urban areas.
• PAYMENT TO INDIVIDUALS				
	Food Stamps	Payments to low income persons in the form of coupons to supplement their food purchasing ability.	N/A	Low income persons.
	Medicare	Payments to Older Americans to assist them in meeting their medical expenses.	Hospitals and other medical service providers.	Older Americans
	Social Security, Retirement and survivors.	Payments to el gible retired persons, their dependents, and their survivors.	N/A	Retired workers, 62 years and over, their dependents and their survivors.

TABLE 3 Continued

Social Security, Disability Insurance	Payments to persons unable to work due to physically or mentally impairment.	N/A	Disabled adults.
Supplemental Security Income	Supplemental payments to persons over 65 and to persons blind or disabled whose income and resources are below specified levels.	N/A	Persons 65 years and over, blind and disabled persons

ALASKA

Alaska has lost a total of $258 million in federal aid since 1981, an amount equal to $589 per person in the state. Alaska ranks 2nd out of all the states in per capita losses.

Grant-in-aid losses totalled $237 million, or $540 per person. Alaska ranks 2nd out of all the states in grant-in-aid losses. It ranks 1st in cuts in 6 separate programs -- Education Block Grants, Impact Aid, Employment Services, Job Training, EDA, and EPA Wastewater. It ranked within the top 5 states in losses in 9 other program areas.

Losses in payments to individuals totalled $22 million, or $49 per person. Alaska ranks last out of all the states in per capita losses in this category, due primarily to a disproportionately small elderly population.

DELAWARE

Delaware has lost a total of $227 million in federal aid since 1981, an amount equal to $378 per person in the state. Delaware ranks 22nd out of all the states in per capita losses.

Grant-in-aid losses totalled $156 million, or $259 per person. Delaware ranks 23rd out of all the states in grant-in-aid losses. It ranks 4th, however, in losses in the Education Block Grant program, 5th in cuts to the Special Program for the Aging, and within the top 10 states in losses in 9 additional programs.

Losses in payments to individuals totalled $71 million, or $118 per person. Delaware ranks 28th out of all the states in per capita losses in this category.

DISTRICT OF COLUMBIA

The District of Columbia has lost a total of $538 million in federal aid since 1981, an amount equal to $852 per resident. The District ranks 1st out of all the states in per capita losses, pricipally because it is a completely urban jurisdiction with a large poverty population.

Grant-in-aid losses totalled $445 million, or $706 per person. The District ranks 1st out of all the states in grant-in-aid losses. It ranks 1st among all the states in 14 separate grant programs and within the top five in 13 more. It is particularly hard-hit in the Health Service area, where it suffered the highest cuts in all 5 categories.

Losses in payments to individuals totalled $92 million, or $146 per person. The District ranks 3rd out of all the states in per capita losses in this category.

FLORIDA

Florida has lost a total of $3.7 billion in federal aid since 1981, an amount equal to $351 per person in the state. Florida ranks 30th out of all the states in per capita losses.

Grant-in-aid payments to individuals totalled $1.8 billion, or $180 per person. Florida ranks 47th out of all the states in grant-in-aid losses.

Losses in payments to individuals totalled $1.8 billlion, or $172 per person. Florida ranks 1st out of all the states in per capita losses in this category, because of its disproportionately elderly population. Florida ranks 1st in per capita cuts in both Medicare and the main part of the Social Security program, Retirement and Survivors insurance.

GEORGIA

Georgia has lost a total of $1.7 billion in federal aid since 1981, an amount equal to $305 per person in the state. Georgia ranks 43rd out of all the states in per capita losses.

Grant-in-aid losses totalled $1.1 billion, or $204 per person. Georgia ranks 40th out of all the states in grant-in-aid losses. It ranks 6th, however, in cuts in Child Nutrition programs, and 7th in Preventive Health losses.

Losses in payments to individuals totalled $571 million, or $101 per person. Georgia ranks 42nd out of all the states in per capita losses in this category.

ILLINOIS

Illinois has lost a total of $4.5 billion in federal aid since 1981, an amount equal to $396 per person in the state. Illinois ranks 16th out of all the states in per capita losses.

Grant-in-aid losses totalled $3.1 billion, or $267 per person. Illinois ranks 18th out of all the states in grant-in-aid losses. It ranks 5th in cuts to Special Milk and Social Services programs, however, and 4th in losses of Urban Mass Transit Aid. It also suffered the 7th highest cut in the Community Development Block Grant program.

Losses in payments to individuals totalled $1.5 billion, or $129 per person. Illinois ranks 13th out of all the states in per capita losses in this category.

KANSAS

Kansas has lost a total of $668 million in federal aid since 1981, an amount equal to $277 per person in the State. Kansas ranks 47th out of all the states in per capita losses.

Grant-in-aid losses totalled $369 million, or $153 per person. Kansas ranks 51st out of all the states (including the District of Columbia and Puerto Rico) in grants-in-aid losses. It ranks 8th, however, in cuts in Handicapped Education programs, and 9th in losses in both Elderly Feeding and Child Welfare Services.

Losses in payments to individuals totalled $299 million, or $124 per person. Kansas ranks 16th out of all the states in per capita losses in this category, led by above-average losses in both Medicare and the Retirement and Survivors portion of Social Security

Grants:

Catalog No.	Name
84.009	Program for Education of Handicapped Children in State-Supported Schools
84.010	Educationally Deprived Children -- Local Education Agencies
84.011	Migrant Education Program -- State Formula Grant Program
84.012	Educationally Deprived Children -- State Administration
84.013	Educationally Deprived Children in State Administered Institutions Serving Neglected or Delinquent Children

Title: Education Block Grant

Grants:

Catalog No.	Name
84.151	Block Grant for Improving School Program -- State Grants

Title: Handicapped Education

Grants:

Catalog No.	Name
84.023	Handicapped -- Research and Demonstration
84.024	Handicapped Early Childhood Assistance
84.025	Handicapped Innovative Programs -- Deaf-Blind Centers
84.026	Handicapped Media Services and Captioned Films
84.027	Handicapped -- Preschool and School Programs
84.028	Handicapped Regional Resource Centers
84.029	Handicapped Personel Preparation
84.030	Handicapped Teacher Recruitment and Information
84.078	Regional Education Programs for Deaf and Other Handicapped Persons
84.086	Innovative Programs for Severely Handicapped Children

Title: Vocational and Adult Education

Grants:

Catalog No.	Name
84.002	Adult Education -- State Administered Program
84.048	Vocational Education -- Basic Grants to States
84.049	Vocational Education -- Consumer and Homemaking Education
84.050	Vocational Education -- Program Improvement
84.052	Vocational Education -- Special Programs for the Disadvantaged
84.053	Vocational Education -- State Advisory Council

84.121	Vocational Education -- State Planning and Evaluation
	Vocational Education Improvement Block Grant

Title: Impact Aid

Grants:

Catalog No.	Name
84.041	School Maintenance in Federally Affected Areas -- Maintenance and Operation

Title: Head Start

Grants:

Catalog No.	Name
13.600	Administration for Children, Youth and Families -- Head Start

Employment and Training

Title: Employment for Older Americans

Grants:

Catalog No.	Name
17.235	Senior Community Service Employment Program

Title: Employment Services and U.I. Administration

Grants:

Catalog No.	Name
17.207	Employment Service Grants
17.225	Unemployment Insurance -- State Administration

Title: Job Training

Grants:

Catalog No.	Name
10.663	Young Adult Conservation Corps -- Grants to States
17.232	Comprehensive Employment and Training Programs (CETA)

17.234	Employment and Training - Indians and Native Americans

Title: Work Incentives

Grants:

Catalog No.	Name
13.646	Work Incentive Program -- Child Care and Other Social Services
17.646	Work Incentive Program

Health Services

Title: Preventive Health

Grants:

Catalog No.	Name
13.262	Occupational Safety and Health Research Grants
13.263	Occupational Safety and Health -- Training Grants
13.268	Childhood Immunization Grants

13.977	Preventive Health Service -- Venereal Disease Control Grants
13.978	Venereal Disease Research, Demonstration, Information and Education
13.991	Preventive Health Services Block Grant

Title: Health Resources

Grants:

Catalog No.	Name
13.293	State Health Planning and Development Agencies
13.294	Health Planning and Health Systems Agencies
13.342	Health Professions -- Student Loans
13.359	Nurse Training Improvement -- Special Projects
13.361	Nursing Research Project Grants
13.364	Nursing Student Loans
13.379	Grants for Graduate Training in Family Medicine
13.381	Health Professions -- Financial Distress Grants
13.820	Scholarships for First Year Students of Exceptional Financial Need
13.822	Health Careers Opportunity Program
13.824	Area Health Educational Centers
13.884	Grants for Residency Training in General Medicine and Pediatrics
13.886	Grants for Physician Assistant Training Program
13.897	Residency Training in the General Practice of Dentistry
13.339	Health Professions Capitation Grants

Title: Health Services

Grants:

Catalog No.	Nam
13.217	Family Planning -- Services
13.224	Community Health Centers
13.246	Migrant Health Center Grants
13.260	Family Planning -- Personnel Training
13.965	Black Lung Clinics
13.974	Family Planning -- Services Delivery Improvement Research Grants
13.993	Primary Care Block Grant
13.994	Maternal and Child Health Services Block Grant

Title: Alcohol, Drug Abuse and Mental Health

Grants:

Catalog No.	Name
13.242	Mental Health Research Grants
13.244	Mental Health Clinical or Service Related Training Grants
13.271	Alcohol Research Scientist Development and Research Scientist Awards
13.272	Alcohol National Research Service Awards for Research Training
13.273	Alcohol Research Programs
13.274	Alcohol Clinical or Service Related Training
13.277	Drug Abuse Research Scientist Development and Research Scientist Awards
13.278	Drug Abuse National Research Service Awards for Research Training

13.279	Drug Abuse Research Programs
13.280	Drug Abuse Clinical or Service Related Training
13.281	Mental Health Research Scientist Development and Research Scientist Awards
13.282	Mental Health National Research Service Awards for Research Training
13.992	Alcohol, Drug Abuse, and Mental Health Block Grant

Title: Medicaid

Grants:

Catalog No.	Name
13.714	Medical Assistance Program
13.777	State Health Care Providers Survey Certification

Nutrition

Title: Child Nutrition

Grants:

Catalogue No.	Name
10.553	School Breakfast Program
10.555	National School Lunch Program -- Section 4
10.555	National School Lunch Program -- Section 11

Appendix D

EXPLANATION OF CURRENT SERVICES AND REAL DOLLAR LOSS

State of the States uses the concept of current services to measure the real dollar loss to states and localities under the Reagan administration. This method, employed by both OMB and CBO, estimates the dollar amount necessary to provide the same number of program participants with the same level of service as in some specified base year. In the case of an education program, participants can be easily thought of as those students provided federally-sponsored services. Capital construction programs, on the other hand, provide a different sort of participant. For example, the number of miles of highway or rail track would be the best measure for a transportation program.

The level of service is directly tied to the base year chosen. The base for this report represents pre-Reagan budget policy and was determined for each of the 39 program areas using the FY 1981 appropriation prior to any rescission or legislative change made by the Reagan administration. Each program base was increased (and in some cases decreased) by an appropriate price deflator or index of change for each of the three years.

The index assigned to each program measures as closely as possible, the price effects to goods and services purchased with program dollars. For example, a deflator which indexes changes in food prices was used for child nutrition programs, one which measures the costs associated with health care delivery for Medicaid, and one which reflects changes in fuel costs for the low income energy assistance program. The deflators used in this report account for actual price changes through FY 1983 and use Data Resources Inc.'s latest forecast for FY 1984 and FY 1985 (March, 1984 Near Term Review).

This methodology is similar to that employed by the Congressional Budget Office. The one major difference is that price deflators used for The State of States also reflect the period in which program dollars are actually obligated. Forward-funded programs such as compensatory education use a deflator for the period July to July, whereas programs such as AFDC use October to October (federal fiscal year). CBO determines all current service estimates on the basis of federal fiscal year.

To use current service estimates for determining real dollar loss two more steps were required. First, the national current service estimates were allocated among the states in accordance with the appropriate formula or actual program distribution for that year. In other words, a simulation was performed for each national current service level in order to estimate how much each state would receive under a given funding level. These allocations account for any legislative or administrative changes that have occurred as well as new data used to calculate funding levels (e.g., 1980 census figures).

The difference between a state's current service estimate and what it actually received in FY 1982 and FY 1983 or is estimated to receive in FY 1984 and FY 1985 is a state's real dollar loss. In the tables, when an actual amount is greater than a current services estimate the gain is shown as a negative.
